

**UNITED STATES
NUCLEAR REGULATORY COMMISSION
ADVISORY COMMITTEE ON REACTOR SAFEGUARDS
WASHINGTON, DC 20555 – 0001**

May 6, 2013

Commander Stephen Fuller
Naval Sea Systems Command
1240 Isaac Hull Avenue, Mail Stop 8041
Washington Navy Yard DC 20376-8041

Dear Commander Fuller:

I would like to thank you on behalf of the Advisory Committee on Reactor Safeguards (ACRS) for sponsoring our visit to the USS George H. W. Bush (CVN-77) on April 17-18, 2013. The opportunity to visit a U.S. Navy carrier at sea has been a once in a lifetime event for me and my colleagues. Witnessing the skills and professionalism of the officers and crew of young men and women has been a fascinating and inspiring experience.

You and your outstanding team provided a warm welcome, detailed and informative briefings, and tours of the ship, including the propulsion plant and control spaces. Our observations of control room operational drills were very informative and relevant to our current review of the power plant design for the USS Gerald R. Ford (CVN-78). The officers and sailors who briefed us demonstrated a thorough knowledge of the complex systems and components for which they were responsible, and answered all of our questions.

We specifically would like to highlight the outstanding support we received from your Reactor Officer Assistant, Commander Paul Clifford.

Sincerely,

/RA/

J. Sam Armijo
ACRS Chairman
