April 29, 2013

Mr. Shawn W. Seeley  
United States Nuclear Regulatory Commission (U.S. NRC)  
Division of Nuclear Materials Safety  
2100 Renaissance Boulevard  
Suite 100  
King of Prussia, PA 19406-2713

Dear Mr. Seeley:

Subject: NRC Form 313, Application for Materials License

Renewal License No. 06-07945-01

Control No. 580171 (Timely Receipt Notice)

030-03799

This letter is a follow up to the renewal of the Application for Materials License (NRC Form 313) that was faxed to the Licensing Assistance Team on March 4, 2013. Be advised the State of Connecticut, Department of Transportation, (Department) management is committed to providing radiation safety, security, and control of nuclear density gauges in compliance with the U.S. NRC regulations. I have reviewed the contents of the renewal license and application, and concur with the contents, however I am relying on the Department's Radiation Safety Officer (RSO), Ms. Teresa Donahue, regarding the technical aspects of the application.

In addition, the Department has provided the proper resources, space, equipment, personnel, and time to the radiation safety program to ensure that public and worker safety is appropriately addressed. Ms. Teresa Donahue, Department RSO, is qualified and competent to manage this program effectively.

If you have any questions or require further information, please contact Ms. Donahue at (860) 594-2663.

Very truly yours,

James P. Connery  
Transportation Division Chief  
Bureau of Engineering and Construction
