**SUBJECT: WATERFORD STEAM ELECTRIC STATION, UNIT 3 – NOTIFICATION OF
TI-186 INSPECTION (NRC INSPECTION REPORT 05000382/2013405) AND
REQUEST FOR INFORMATION**

Dear Ms. Jacobs:

From July 29 to July 31, 2013, inspectors from the Nuclear Regulatory Commission's (NRC) Region IV office will perform the Temporary Instruction (TI)-186, "Inspection of Procedures and Processes for Responding to Potential Aircraft Threats." In order to minimize the impact to your onsite resources and to ensure a productive inspection, we have enclosed a request for documents needed for this inspection. It is important that all of these documents are up to date and complete in order to minimize the number of additional documents requested during the preparation and/or the onsite portions of the inspection. Also, in order to demonstrate compliance with TI-186, we ask that you have the necessary staff members available to the inspection team to assist in any plant walk-throughs, interviews, and simulator demonstrations.

We have discussed the schedule for these inspection activities with your staff and understand that our regulatory contact for this inspection will be Mr. Jim Pollock, Licensing Coordinator. If there are any questions about this inspection or the material requested, please contact Chris Steely, lead inspector, at (817) 200-1432 (chris.steely@nrc.gov) or Thomas Farina at (817) 200-1117 (thomas.farina@nrc.gov).

This letter does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing information collection requirements were approved by the Office of Management and Budget, control number 3150-0011. The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget control number.

D. Jacobs

- 2 -

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Website at <http://www.nrc.gov/reading-rm/adams.html> (the Public Electronic Reading Room).

Sincerely,

/RA/

Vincent G. Gaddy, Chief
Operations Branch
Division of Reactor Safety

TI-186 INSPECTION DOCUMENT REQUEST

TO: Jim Pollock
Licensing Coordinator, Waterford Steam Electric Station, Unit 3
504-739-6561

FROM: Chris Steely
Operations Engineer, NRC RIV
817-200-1432

SUBJECT: INFORMATION REQUEST TO SUPPORT JULY, 29-31, 2013, TI-186
INSPECTION, "INSPECTION OF PROCEDURES AND PROCESSES FOR
RESPONDING TO POTENTIAL AIRCRAFT THREATS."

The following information is requested in order to support inspection preparation activities. Requested materials should be sent either electronically or hardcopy in order to arrive at the Region IV office no later than June 17, 2013.

- Electronically: TO: Chris.Steely@nrc.gov
cc: Thomas.Farina@nrc.gov
- Hardcopy: TO: U.S. Nuclear Regulatory Commission, Region IV
ATTN: Chris Steely
1600 E. Lamar Blvd
Arlington, TX 76011

Document Request:

- Procedure(s) that describe actions taken to address potential aircraft threat notifications onsite. This may include procedures that operations, security, emergency preparedness, and health physics staff use.
- Plant specific analyses prepared to support the designed actions you have taken to address this issue in your procedures. Such analyses were described for support of site actions in the topical Regulatory Guide 1.214 (dated January 2009).
- Training materials used to train the various affected groups when contacted with a potential aircraft threat (licensed operators, operators in training for a license, non-licensed operators, security, EP, HP, fire brigade, and other support staff, as examples).
- If the site has conducted exercises or drills to evaluate the ability of staff to implement these procedures in the past, provide any documentation summarizing the results of these events. If any condition reports came out of the exercises/drills, provide those as well.
