Subject: Request for License Termination

Dear Mr. Ferdas:

Decommissioning activities at the ABB/Combustion Engineering Windsor, Connecticut Site ("Site") have been completed. Remediation of the Site was conducted under the provisions of an approved Decommissioning Plan authorized under NRC License No. 06-00217-06. With the completion of remediation operations on the site, there is no longer any need for activities or possession of materials authorized by this license, as all decommissioning and waste shipping activities have been completed. There is no licensed material possessed at the Site under License No. 06-00217-06, as certified in the enclosed NRC Form 314.

Radiological surveys to demonstrate that the Site is suitable for release have been performed and documented in a series of seven Final Status Survey Reports (FSSR), which were submitted to the NRC between July 2011 and May 2012. These reports provide the documentation that the remaining licensed portion of the Site meets radiological criteria for unrestricted use. Upon the satisfactory completion of NRC review of the ABB FSSR for the Site, ABB requests termination of its NRC License No. 06-00217-06.

Coincident with license termination, ABB also requests that the NRC issue a letter to ABB that serves to return all prior original financial assurance instruments filed with the NRC for License No. 06-00217-06. Please note that the NRC letter returning the prior documents should contain the following language: "the Amended and Restated Standby Trust Agreement entered into as of November 1, 2012, by and between ABB Inc. as "Grantor" and the JPMorgan Chase Bank, N.A. as "Trustee", and the Irrevocable Standby Letter of Credit, JPMorgan Chase Bank L/C No. [Note: L/C No. to be added by NRC], are no longer required and may be terminated by ABB Inc. and JPMorgan Chase Bank, N.A."
