Subject: Why I signed -- Dear readers. Would

Dear Nuclear Regulatory Commission (U.S.Nuclear Regulatory Commission),

I just signed Rainbow Hawk's petition "[U.S.Nuclear Regulatory Commission: SHUT DOWN the San Onofre nuclear plant](#)" on Change.org.

Here's why I signed:

Dear readers. Would be nice for everyone who's living there around and for environment ...to rather focus on sustaining and nature-based energy sources like wind- or sun power. If we are dealing with high volume industry, the sight should still be targeted on life-sustaining products and energy sources. For the moneyman; the money of the future may be hiding there "in the green bushes". Seriously, do we need such amounts of energy and blind ideas to create all the fancy - never really evolving - bussiness with a price of such amount of dirt and disharmony? Through the compromises comes improvement and co-understanding. Through the process comes realizations and balance. With nature and planet earth we are meant to be respectful.

Sincerely,
Janne Passiniemi
Tampere, Finland
