TRUMAN MEDICAL CENTER
Hospital Hill

Better. For Everyone.

May 9, 2013

Nuclear Regulatory Commission
Medical Licensing Division, Region III
2443 Warrenville Road
Lisle, IL 60532-4351

Dear Madam/Sir,

Please amend our Radioactive Materials License #24-25816-01 for Truman Medical Center to include the removal of an old waste storage area. The new area was sent in on April 15th and approved by Toye Simmons. The decommissioning results of the old area are enclosed for your review.

The efficiency of the liquid scintillation counter is 98%. The background measurement for the close-out leaks and area surveys are listed on the reports. All counts were taken for one minute.

A radionuclide history as well as wipe/survey maps and test results have all been included for your review. At this time, we ask that you please remove the old waste storage location from our license as an area of use and release the area into public use.

Your attention in this matter is greatly appreciated. Should you have any additional questions, please contact our health physicists, Marcia West or Renee Carlson, at 816-807-8090 or by fax at 816-974-1443.

Sincerely,

Lawrence Ricci, D.O.
Radiation Safety Officer

RECEIVED MAY 17 2013

History of Radionuclides and Instruments

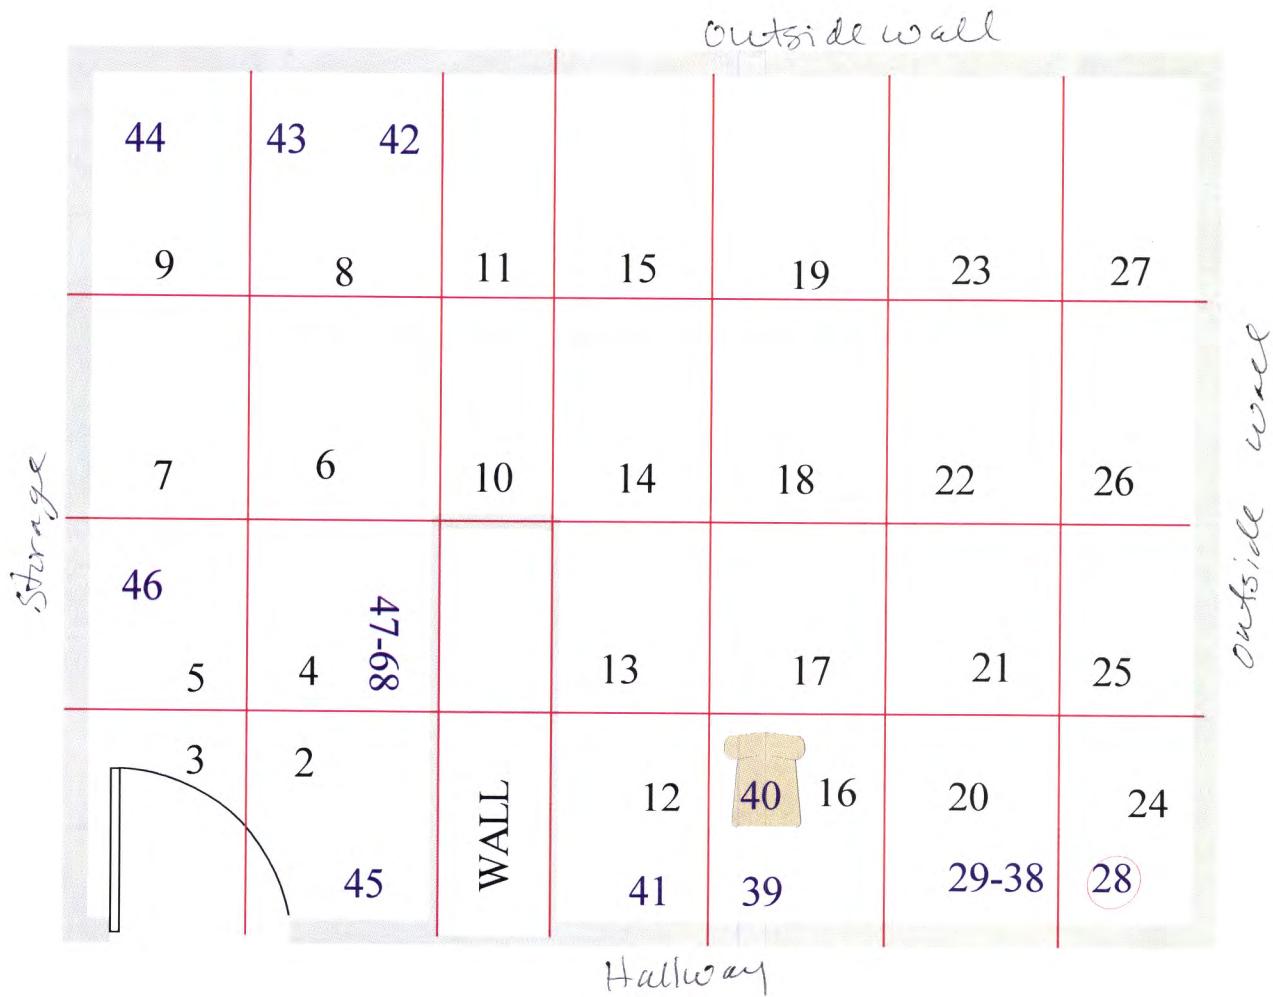

Truman Medical Center
2301 Holmes St
Kansas City, MO 64108

The only items stored in this area were the food/sheet wastes from the I-131 therapy patients, an old dose calibrator with a very old Cs-137 stick source, some liquid gold bottles, two desks and a chair, old empty metal drums and a lot of lead bricks.

Prior to our decommissioning, all waste items were monitored and disposed of properly.

After our decommissioning, the Cs-137 sealed source was moved to the hot lab to be sent away for proper disposal by the manufacturer. All of the other items in the room were left there to be either disposed of or moved to the new storage area (lead bricks).
