**Docket:** NRC-2013-0070

Application and Amendment to Facility Operating License Involving Proposed No Significant Hazards Consideration Determination

**Comment On:** NRC-2013-0070-0001

Application and Amendment to Facility Operating License Involving Proposed No Significant Hazards Consideration Determination; San Onofre Nuclear Generating Station, Unit 2

**Document:** NRC-2013-0070-DRAFT-0128

Comment on FR Doc # 2013-08888

## Submitter Information

**Name:** Gloria Van Lydegraf

**Address:**

817 Kern St  
Chico, CA, 95928

213

4/16/2013

78 FR 22576

## General Comment

Nuclear power is too risky, and too costly. Global warming will continue to contribute to the rising intensity of weather events like the tsunami that hit the nuclear plant in Japan. California is already at high risk for earthquakes that could damage the San Onofre plant. We have not come up with satisfactory long term solutions to dealing with nuclear wastes. Incidents of protesters entering nuclear sites has proven that we cannot assume that any site is safe from terrorist attacks.

The safety of nuclear power plants is questionable anywhere, but clearly unacceptable in southern California.
