

# Petition to Permanently Shut San Onofre Nuclear Generating Station

Date: 5/11/13

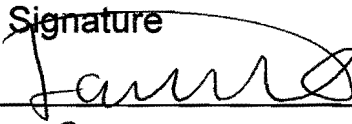

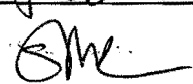

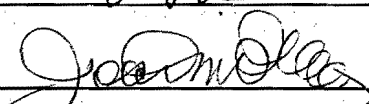

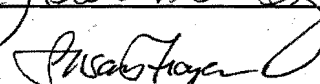

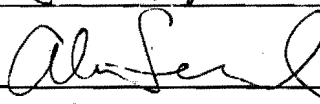

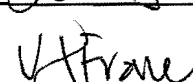

Chair Allison M. Macfarlane  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

We, the undersigned, want to see San Onofre Nuclear Generating Station permanently shut down. Our rationale includes many common sense reasons. Among them are:

- ongoing problems with the steam generators and associated safety issues
- worst safety record in the US
- location in an active earthquake/tsunami zone
- lack of safe long term storage for high level nuclear waste
- no realistic evacuation plan
- reduced property values

SONGS unnecessarily compromises the safety and security of our families, and at exorbitant expense to ratepayers and taxpayers. We have no need for the energy produced by this plant, because we have stored energy excesses and more viable alternative sources of power.

Please use your influence to bring about the decommissioning of this hazardous plant. Let's all work together to create safer, cleaner, less costly ways to provide for Southern California's energy needs.
