dana point, CA, 92629

## General Comment

Please do not even consider allowing san onofre nuclear power station to restart. It is imperative that you do not allow southern california edison to fast track that application process. It is not sound to allow a restart without having all the facts from the scientific community considered. Please keep on track for the normal process to proceed before allowing a restart. The power plant has been shut down for over nine months. Please consider this a important signal that in over a year the problems have not been resolved and you should be looking at shutting down san onofre, not restarting it. There is safer more viable energy sources that we should be considering.
