## Submitter Information

**Name:** William Manners

**Address:**

15799 37th Ave  
Clearlake, California, 95422

## General Comment

Why do you want to use the most dangerous and hazardous material you can possibly find to generate energy when it can be done sun, wind and water? There is no safe way to use nuclear material! You will always end up with hazardous waste material that could be used for dirty bombs in the wrong hands. Why create that waste in the first place? We are already being exposed to the safe use of nuclear material from Japan. Even with the best of intentions it is a bad way to generate energy!
