

July 18, 2013

The Honorable John Sibert  
City of Malibu, Councilmember  
6665 Zumirez Drive  
Malibu, CA 90265

Dear Mr. Sibert:

On behalf of the U.S. Nuclear Regulatory Commission (NRC), I am responding to your letter of May 15, 2013, in which you expressed concerns regarding the proposed restart of San Onofre Nuclear Generating Station (SONGS), Unit 2. In addition, you referenced Southern California Edison's April 5, 2013, license amendment request and associated proposed "no significant hazard consideration" analysis and determination. Lastly, you stated that all ongoing investigations that are directly related to the replacement steam generators at SONGS, and in particular their design, and root cause of the severe wear should be completed before even a limited restart.

On June 7, 2013, Southern California Edison announced its closure of SONGS and, in a letter to the NRC dated June 12, 2013, certified permanent cessation of power operations. NRC inspection oversight for SONGS will continue until completion of decommissioning. Decommissioning is a process, outlined in NRC regulations and guidance, for safely removing a facility from service and reducing residual radioactivity to a level that permits restricted or unrestricted use of the property and termination of the NRC license. Throughout this process, the NRC will hold public meetings and post information on the website to keep the public informed.

On behalf of the NRC, I want to thank you for your continued involvement in matters related to nuclear safety. You and your constituents' interest and feedback help us to fulfill our public health and safety mission in an open and transparent manner.

Sincerely,

/RA/

Allison M. Macfarlane
