Subject: Church Rock 2013 Surety Update Acceptance

Yolande,

I have reviewed United Nuclear Corporation's (UNC) Church Rock sites revised surety update submittal dated March 21, 2013. The submittal included a letter from the licensee stating a revised rider was being submitted that took into account the increase in the CPI-U between March 2012 (end of February 2012 figure) and February 2013. The submittal also included the original signed duplicate rider, a notarized "Acknowledgement By Surety," and a notarized "Power of Attorney" document. UNC last completed a comprehensive re-baselining of the surety calculation in September 2004; however, the U.S. Environmental Protection Agency is currently directing a Site -Wide Supplemental Feasibility Study (SWSFS) at the site which is expected to be completed by 2014. A review of the results of the SWSFS will be compared against the conditions used in the initial re-baseline calculation. Based on my review, I find the rider for the performance bond in compliance with 10 CFR 40 Appendix A, Criteria 9 and 10.

Please contact me if you have any additional questions or concerns.

Thanks,

Reggie
