Dear Chairman MacFarlane,

Please do not permit the restart of the defective San Onofre nuclear reactor, Unit # 2. Please require a thorough license amendment process and hearing regarding San Onofre safety issues prior to the NRC decision on whether or not to allow restart. I have very little confidence in the NRC at this point in time. I hope you'll prove me wrong.

Thank you for your consideration.

~~~~~  
"A common denominator, in every single nuclear accident -- a nuclear plant or on a nuclear submarine -- is that before the specialists even know what has happened, they rush to the media saying, 'There's no danger to the public.' They do this before they themselves know what has happened because they are terrified that the public might react violently, either by panic or by revolt." ~ Jacque Cousteau, 1989
