

Chairman Allison M. MacFarlane,

I am a high school student from Woodbridge High School in Irvine, CA and I'm interested in the opening of the San Onofre Nuclear Plants. I don't believe that it is acceptable to open plants that could have a huge health impact on those around the area and the environment based on chance without actual proof that these plants will not leak. If these plants were to open, we should at least wait for the technology of steam generator tube radiation detectors to improve to ensure the health & wellness of citizens in neighboring communities.

Best,
Kira Tran
