

04-13-13

Dear Chairperson Macfarlane,

Please block any efforts to lower San Onofre safety standards. This is a very old nuclear power plant - well past its use-by date! It already has amassed more safety complaints than any other reactor. Insist on a transparent, public participatory license amendment process. We need a no-risk guarantee before Sano is re-started. We eight-million families in the area are counting on you not to be swayed by SC Edison's claims -

Sincerely, Mel Keruch
