

UNITED STATES
NUCLEAR REGULATORY COMMISSION

REGION III
2443 WARRENVILLE ROAD, SUITE 210
LISLE, IL 60532-4352

MAY 20 2013

Jerry Bishop, CNMT
Radiation Safety Officer
St. Vincent Medical Group, Inc.
8333 Naab Road
Suite 400
Indianapolis, IN 46260

Dear Mr. Bishop:

Enclosed is Amendment No. 60 to your NRC Material License No. 13-19923-01 in accordance with your request. Please note that the changes made to your license are printed in **bold font**.

We have reviewed your letter dated March 25, 2013, and its attachments. Based on your provided information, we have concluded that all licensable radioactive material has been removed from your facility located at 1116 N. 16th Street, Suite B, Lafayette, Indiana, and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Therefore, we have authorized the release of your location of use above, for unrestricted use.

In addition, we removed Condition 13 regarding the decommissioning financial assurance requirement from your license because it did not apply to the scope of your program.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

J. Bishop
