Director of FSME
Attn: GLTS
USNRC
Washington, DC 20555-0001

In fulfillment of the requirement of 10 CFR 31.5(c) 8, we hereby notify you that on 4/16/2013 we transferred the self-luminous exit signs listed on the attached spreadsheet to Shield Source Inc. RR#5 Municipal Airport, Peterborough, Ontario, K9J6X6, Canada with CNSC License # NSPFOL-12.00/2012. As required, for each sign listed on the spreadsheet, we include the name of the manufacturer, model number, and serial number.

If you have any questions, please contact Amy S. Mirelez @ 313-995-1140

Sincerely,

Amy S. Mirelez

Attn: RMA #9577PA-RMA

DOT Hazmat Training and Acknowledgement FOR RETURN OF SELF-LUMINOUS EXIT SIGNS

Self-Luminous EXIT signs are illuminated with internal light sources powered by tritium gas. Tritium gas is a radioactive isotope of hydrogen. For this reason, Federal Regulations require that any person shipping this product must have training sufficient to comply with US Department of Transportation regulations in the Code of Federal Regulations #49 Part 172.

To receive this training, the shipper must read, understand and perform the following steps. Place a check mark at each step after complete. Sign and date this form. Upon receipt of this completed form we will provide you with the RMA Number required for the return of these signs along with complete shipping instructions.

Keep this completed form in your files for at least 3 years in case of regulatory inspection.

- The EXIT signs are to be shipped as excepted packages for radioactive instruments and articles (49CFR 173.424). No special packaging is necessary.
- A sturdy cardboard box, plastic drum, or metal drum will be sufficient to ship the signs because they all meet the general package design requirements of 49CFR173.410. The package must withstand normal conditions of transport without any deterioration. The container must be clean and never have been near other radioactive material so that the shipper can be sure that there is no radioactive contamination on the outside of the container.
- You must ensure that the active materials (the glowing inner tubes) are completely enclosed by non-active components (the plastic sign housing). Therefore, each sign must be visually inspected to ensure that it is not crushed or punctured in a way that might cause an inner light tube to be broken.
- Each sign must contain less than 20 curies of tritium (see the sign's rear label). The total amount of curies to be placed into each container must be less than 100 Ci. (Add up the curie content of each sign as you put them into the container.)
- If a transportation incident occurs, you must report the incident to the USDOT per 49 CFR 171.15 and 171.16.
- Read and understand the Isolite "Packaging Instructions" and follow each step exactly.
