**RE: License # 52-19064-01, Increase in maximum amount of millicuries.**

03018917

Gentlemen,

We noted that in our last license amendment (Amendment No. 8) the maximum amount of allowable millicuries were reduced from 210 to 200 for Cesium 137 and to 1000 from 1050 for Americium 241. We currently have 21 CPN Models, in addition to four Seaman C 300 models and require that the amount be increased. Please let us know steps to take to correct this if any are required. Our current license number with the NRC is 52-19064-01.

If any doubt arises please contact us, thank you.

Respectfully submitted,

**JACA & SIERRA TESTING LABORATORIES**
