**Subject:** Issuance of NEI 11-04A, Revision 0, *Nuclear Generation Quality Assurance Program Description*

**Project Number: 689**

This letter provides for information NEI 11-04A, Revision 0, which incorporates the NRC's Final Safety Evaluation Report (SER), dated May 9, 2013. The Final SER indicates that NEI 11-04 provides an acceptable basis for establishing a quality assurance program that complies with 10 CFR Part 50, Appendix B.

In accordance with NRC guidelines, we have incorporated the final SER and responses to NRC RAIs, and have reissued the QAPD as NEI 11-04A.

We appreciate the NRC action to complete and document its evaluation of the generic QAPD. We expect that future ESP and COL applicants will benefit by being able to reference NEI 11-04A and the staff's final SER in their applications.

Should you have any questions regarding this letter or the attachment, please contact me.

Sincerely,
