SUBJECT: NUCLEAR REGULATORY COMMISSION INSPECTION REPORT 40-3392/2013-003

Dear Mr. Smith:

This letter refers to the inspections conducted from April 1, 2013 through June 30, 2013, at the Honeywell Metropolis Works facility. The purpose of the inspections was to determine whether activities authorized under the license were conducted safely and in accordance with NRC requirements. Inspections focused on evaluating activities conducted to implement the requirements of Confirmatory Order EA-12-157, issued on October 15, 2012. The enclosed report presents the results of these inspections. On June 5, 2013, the findings were discussed with you and other members of your staff.

The inspections consisted of an examination of activities conducted under your license as they relate to public health and safety to confirm compliance with the Commission's rules and regulations and with the conditions of your license. Within these areas, the inspections consisted of a selective examination of procedures and representative records, observations of seismic upgrade modification activities in progress at the plant, and interviews with personnel. Based on the results of these inspections, no violations of regulatory requirements were identified.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be made available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation. If you have any questions, please call me at (404) 997-4628.

Sincerely,

/RA/

James A. Hickey, Chief
Fuel Facility Inspection Branch 2
Division of Fuel Facility Inspection
