Importance: High

Marilyn,

In our March 12, 2013 response to the NRC's February 12, 2013 RAIs on our most recent DFP submittal (January 2012), we committed to disaggregate the costs in Tables 35 and 36 to a presentation more consistent with NRC guidance and the balance of AREVA's DFP. In a phone conversation with Bob Link, you indicated that the NRC wanted to see the cost tables reflecting this disaggregation prior to its formal acceptance of AREVA's RAI responses. You further indicated that these revised draft tables could be conveyed informally for the NRC's interim review. Accordingly we are conveying new Table Nos. 35 through 42 which present the costs of these two potential soil investigation/remediation projects in a fashion more consistent with the balance of the decommissioning cost estimate. You'll note that our reconsideration of these costs has resulted in an approximate 3% increase in the cost estimate for these two potential projects (increased labor costs applied to certain tasks). Consistent with our March 12 RAI response, AREVA will wait until receiving the NRC's official acceptance of our RAI responses before we proceed to finalize our DFP, including execution of the still-draft financial assurance instruments. Please let me know if this does not meet your expectations or if you have any more questions at this time. Thanks.

Loren
