Subject: Important Station Update

FOR INTERNAL USE ONLY

To: SONGS Employees and Supplemental Workers

It is with a heavy heart that I share with you SCE's decision to permanently retire both Units 2 and 3. I recognize this difficult announcement is something none of us wanted to hear, but our decision is absolutely the right thing to do.

The tough reality is that the recent Atomic Safety and Licensing Board decision creates significant additional uncertainty regarding our ability to get to an NRC decision to restart Unit 2

this year. This is not good for our customers, our investors and the region.

I could not be prouder of you, the men and women who have put their hearts and souls into addressing the steam generator and the dual unit outages, all the while working safely every day. Indeed, SONGS has served this region well for more than 40 years and each of you has played a role in it.

I recognize how difficult this news is for everyone at SONGS. Today, we will be conducting a series of All Hands meetings so I can talk face-to-face with you about what this means for us as a station, and for you. Meeting times are listed below, and I would ask that you please attend the session for your division.

I will do my best to answer your questions, but will tell you up front, I do not yet have all the answers. More information will be solidified over the next week, but I believe it is important for us to get together and discuss this news. We will work diligently, as we have before, to get answers to your questions. We will treat everyone with dignity and respect, using a process that is fair, legal and ethical.

This morning, Edison International CEO Ted Craver, and other executives, including Ron Litzinger and myself, are holding an investor briefing to inform the financial community and the media of our decision. Below is the company's press statement. Indeed, we can all anticipate a robust media cycle to follow.

I want to emphasize some aspects of what today's decision does not affect. We hold a NRC license that includes many requirements and obligations – including our responsibility to protect the health and safety of the public and our employees. As we move forward, we must continue to meet these license requirements as well as all the requirements of our Emergency Plan and Security Plan. I need -- and ask for -- your continuing support as Nuclear Professionals to ensure we remain as diligent about our responsibilities and obligations as you have demonstrated in the past.

We will have more time to talk in the days ahead, and I look forward to those interactions. But I want to say again how proud I am to be a part of this team, this station. You are the finest employees I have had the privilege to work with and lead. We have important things to accomplish here at SONGS as we prepare for decommissioning, and I know that we will do it together as true Nuclear Professionals. Keep your head up, stay focused on working safely, and never forget our commitment to excellence.

Be proud, but never satisfied!

Pete
