REVISED PUBLIC MEETING NOTICE

MEMORANDUM TO: Aby Mohseni, Deputy Director
Environmental Protection and Performance
Assessment Directorate
Division of Waste Management
and Environmental Protection
Office of Federal and State Materials
and Environmental Management Programs

FROM: James Shaffner, Project Manager */RA/*
Low-Level Waste Branch
Environmental Protection and Performance
Assessment Directorate
Division of Waste Management
and Environmental Protection
Office of Federal and State Materials
and Environmental Management Programs

SUBJECT: TELECONFERENCES BETWEEN THE U.S. NUCLEAR
REGULATORY COMMISSION STAFF AND U.S. DEPARTMENT OF
ENERGY STAFF TO CLARIFY VARIOUS TECHNICAL ISSUES
RELEVANT TO WASTE DETERMINATION FOR H AREA TANK
FARM, SAVANNAH RIVER SITE

DATES & TIME: ~~Wednesday, June 26, 2013,~~ and Wednesday, July 3, 2013
1:00 p.m. – 4:00 p.m.

LOCATION: Audio Teleconference

Interested members of the public can participate in these meetings via a toll-free audio teleconference. For additional details prior to each teleconference, please call the U.S. Nuclear Regulatory Commission (NRC) meeting contact listed on the NRC Web site (James Shaffner).

PURPOSE: The purpose of these public meetings is to afford NRC staff the opportunity to gather additional information related to several technical areas in U.S. Department of Energy's (DOE) Draft Technical Basis Document. This additional information is relevant to the preparation of NRC Requests for Additional Information (RAIs) associated with NRC's preparation of a technical evaluation report for closure of the H Area Tank Farm. In accordance with Section 3116 of the Ronald W. Reagan Defense Authorization Act of 2005, the DOE is required to consult with the NRC prior to the Secretary of Energy's waste determination that certain waste streams do not require management as high level waste.

The consultation process for H Area Tank Farm began on February 6, 2013. To complete its consultation responsibilities, the NRC will prepare a Technical Evaluation Report (TER) which will summarize the NRC staffs' review of DOE's draft waste determination and supporting documentation and provide DOE with recommendations regarding its final waste determination. In order to complete its TER, the NRC staff is in the process of identifying gaps in presently available information which may be addressed by DOE. The RAIs will be formalized and provided to DOE later this summer.

CATEGORY*: These are Category 2 Public Meetings: The public is invited to participate in these meeting with NRC at designated points identified on the agenda.

CONTACT: James Shaffner, FSME/DWMEP
