Grace Pacific Corporation
ATTN: Felicia M. Souza
Radiation Safety Officer
P.O. Box 78
Honolulu, Hawaii 96810

SUBJECT: LICENSE AMENDMENT

Please find enclosed Amendment Number 16 to NRC License Number 53-21273-01 **establishing new maximum possession limit as requested. Based on our telephone conversation on Friday, June 14, 2013, the request to remove the locations of use was not completed because we need the following information:**

1. **Most recent inventory for each location, and**
2. **Most recent leak test for each gauge on the inventory list at each location, and**
3. **Proof the gauges are at another authorized location, were transferred to an authorized licensee, or have either been properly.**

Once you have all the information, you may submit another amendment to have the locations removed.

Also, your license expires on December 31, 2013. You must submit a complete renewal application or termination request at least 30 days before the expiration date on your license. You will receive a reminder notice approximately 90 days before the expiration date. Possession of radioactive material after your license expires is a violation of NRC regulations.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14)(viii). You should review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or if you have any questions, contact me at 817-200-1596.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

NRC no longer publishes the NRC Rules and Regulations loose leaf supplements. However, an electronic version of the NRC's regulations is available on the NRC Web site at www.nrc.gov. Additional information regarding use of radioactive materials may be obtained on the NRC Web

site at <http://www.nrc.gov/materials/miau/mat-toolkits.html>. This site also provides the link to the toolbox for updated information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/
