Chief Information Officer  
Mail Stop T5-F09  
Washington, D.C. 20555-0001

Attn: Donna L. Sealing, FOIA / Privacy Officer

Under the Freedom of Information Act, this is a request for a copy of a supplemental report identified as follows:

About 1964 Pacific, Gas & Electric Co., proposed a nuclear power plant at El Jarro Point near Davenport, California known locally as the North Coast, Santa Cruz project. Their application to the A.E.C. included investigating underground conditions in the area. Additional information was requested by the Commission and supplemental information on underground conditions was provided by Pacific, Gas & Electric Co.

I would like a copy of the supplemental report.

Sincerely,

Tom Boardman
