Date: Thursday, June 13, 2013 8:55:00 AM

Good Morning Bob,

Please be aware that the requirement to name an RSO is a license condition. Not having a qualified individual named as RSO is a violation of that license condition (License Condition No. 11.B.). Since receiving notification that the former RSO has left the company, a licensing action has been opened to amend the license. Until you have made a final decision on a qualified individual to maintain responsibility of your radiation safety program, you will need to name a person who will be responsible for the management of the radiation safety program in the interim so that you will not be in violation. You may want to consider one of the authorized users currently named on the license. Also, please be aware that if there is not a qualified individual to assume the RSO or Authorized user responsibilities, work with radioactive materials may have to be suspended until such an individual is identified. Please submit a letter to us identifying the person who will be the interim RSO and assume responsibility for your radiation safety program until a permanent replacement is named. If you are ready to name a permanent replacement, please submit the name in addition to information demonstrating the person is qualified by training and experience commensurate with the types and quantities of materials being used. The letter must be signed by a member of your management and can be either faxed (610-337-5269) or can be emailed as a pdf attachment. In the letter please refer to Mail Control No. 581005.

Thank you for your cooperation in the matter.

If you have any questions, please do not hesitate to contact me.

Regards,
Farrah Gaskins

Dear Farrah,

Thank you for your email and for sending along the relevant guidance. We appreciate your follow-up on this matter. Please know that we had already begun a review our needs in this area and will make a determination in the very near future. This review is being led by our Chief Scientific Officer, Erin Duffy, copied on this email.

Kind regards,

Bob

Subject: NRC License Number 06-30726-01

Dear Sir/Madame,

This email is in regard to your NRC licensee referenced above. We received a letter from your former Radiation Safety Officer (RSO) indicating that effective May 21, 2013, he would no longer be employed by the company and therefore would not be the RSO or Authorized User (AU). Since your license currently lists as the RSO a person who has indicated they are no longer employed with the company, your management will need to request to amend the license to appoint a new RSO as soon as possible. Guidance on what information should be submitted can be found in NUREG 1556 Volume 7, Section 8.7.1 (<http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr1556/v7/sr1556v7.pdf>) .

If you have any questions or concerns regarding this email, please contact me.

Regards,

Farrah C. Gaskins
