Dear Sir or Madam:

On March 12, 2012, the NRC issued Reference 1 to all power reactor licensees. Enclosure 3 of the referenced letter contained specific requested actions, requested information, and required responses associated with Recommendation 2.3 for seismic walkdowns. Entergy Nuclear Operations, Inc. (Entergy) provided the requested Seismic Walkdown Report for Indian Point Unit No 3 (IP3) in Reference 2. In that submittal Entergy committed to perform walkdowns for equipment that could not be inspected while at power which were identified in Section 6.3 of the Seismic Walkdown Report. An updated Seismic Walkdown Report was to be submitted in June 2013 to reflect that walkdown. The updated Seismic Walkdown Report is enclosed.

This letter contains no new regulatory commitments. Should you have any questions regarding this submittal, please contact Robert Walpole, Manager, Licensing at (914) 254-6710.
