General Comment

Ownership or partial ownership, where that ownership allows any exercise of control or domination of a nuclear facility by any foreign entity, either direct or indirect, is unacceptable. Any power utility that issues publicly traded stock, should have regulatory limits on the amount of stocks that can be held by foreign investors. Foreign entities should not be allowed to sit on the Board of Directors for any power utility in America. America is a land of the free, do not allow our energy security to be sold to foreign interests, especially nuclear assets!
