General Comment

As someone who lives within 10 miles of Calvert Cliffs, I seriously hope you are not considering revamping the foreign ownership rules for this plant. It is a good rule and needs to stay in place. Further, everyone talks of the 3rd reactor without noting that it will double the size of the plant (not just increase it by another third). We narrowly escaped a tornado here last night. We are assured this plant will withstand a tsunami (not likely in the Bay) but what about a direct hit? Tornadoes around here are increasing. Will a foreign country have any obligation to clean up after a disaster? How can we, the citizens (and neighbors) hold them responsible? We can barely hold our own government responsible! Leave the laws alone, and stop looking for ways to let this expansion happen. By your own laws, it shouldn't happen!
