General Comment

Public safety should come first! Not the preference of the nuclear industry. Entergy should be required to comply totally with the fire regulations set forth by the NRC. It is disgraceful that Entergy is allowed to be below standard in this respect. This risk of fire has been know for a very long time. No more extensions! Nuclear energy is dangerous and not clean energy or sustainable. There is no solution to the radioactive waste problem. Nuclear plants should be phased out and we need to change to alternative energy such as wind, solar, geothermal.
