

Generic Reviews of ITAAC Determination Basis

June 27, 2013

Mahmoud Jardaneh, PE
NRO/DCIP/CITB

Approach

- NRC staff will engage industry on a limited number of ITAAC Determination Bases (IDBs)
- Discussions will be focused on the content and level of detail to support ITAAC closure verification
- NRC staff will not review draft ITAAC Closure Notifications (ICNs)
- Discussions will be conducted in public forums on as-needed-basis

Keys to Success

- IDBs should be generic in nature and different from existing ICN examples in NEI 08-01
- IDBs should be provided at least 2-weeks in advance of scheduled public meetings
- Generic IDBs that apply to more than one design should be added to NEI 08-01

Path Forward

Activities conducted on as-needed basis

- Industry provides generic IDBs discussions
- NRC staff prepares comments on the content and level of detail to support ITAAC closure verification
- Schedule public meetings to discuss staff feedback
- Update NEI 08-01 to add generic IDB examples
