**PLEASE CONFIRM RECEIPT OF THIS REQUEST FOR ADDITIONAL INFORMATION
BY RETURN EMAIL**

License No. 06-16624-01
Docket No. 03011353
Control No. 580392

Dear Ms. Barile;

This is in reference to your application dated March 28, 2013 requesting to renew Nuclear Regulatory Commission License Number 06-16624-01. In order to continue our review, we need the following additional information:

1. It appears from your application that a possible change of ownership (control) has occurred. Licensees must provide full information and obtain NRC's **prior written consent** before transferring control of the license. Control of a license is in the hands of the person or persons who are empowered to decide when and how that license will be used. That control is to be found in the person or persons who, because of ownership or authority explicitly delegated by the owners, possess the power to determine corporate policy and thus the direction of the activities under the license. A transferee is an entity that proposes to purchase or otherwise gain control of an NRC-licensed operation. A transferor is an NRC licensee selling or otherwise giving up control of a licensed operation. Provide the following information concerning changes of control by the applicant (transferor and/or transferee, as appropriate). If any items are not applicable, so state.
 - a. Provide a complete description of the transaction (transfer of stocks or assets, or merger).
 - b. Indicate whether the name has changed and include the new name. Include the name and telephone number of a licensee contact who NRC may contact if more information is needed.
 - c. Describe any changes in personnel or duties that relate to the licensed program. Include training and experience for any new personnel.
 - d. Describe any changes in the organization, location, facilities, equipment or procedures that relate to the licensed program.
 - e. Describe the status of the surveillance program (surveys, wipe tests, quality control) at the present time and the expected status at the time that control is to be transferred.
 - f. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records include documentation of surveys of ambient radiation levels

CFR 35.200 which now includes positron emitting tomography (PET) radiopharmaceuticals. Your application does not request this authorization. If you require this use, please submit a specific request for this authorization and include a list of installed shielding and any specialized equipment specific to 511 keV. Alternatively, you may confirm that you do not use PET radiopharmaceuticals.

7. Provide the manufacturer and model number for any sealed sources that do not meet the criteria listed in 10 CFR 35.65 (i.e. greater than 30 millicuries).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 580392. If you have any technical questions regarding this deficiency letter, please call Mr. Robert Gallagher at (610) 337-5182.

If we do not receive a reply from you within 30 calendar days from the date of this letter, we will assume that you do not wish to pursue your application.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Sincerely,

Robert L. Gallagher
