NRC FORM 374 U.S. NUCLEAR REGULAT	ORY COMMISSION PAGE <u>1</u> OF <u>3</u> PAGES Amendment No. 1			
MATERIALS LICENSE				
Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.				
Licensee	In accordance with the letter dated May 10, 2013			
1. Veterinary Oncology and Hematology Center, LLC	3. License number 06-35037-01is amended in its entirety to read as follows:			
- NR F	EA.			
2. 129 Glover Avenue	4. Expiration date April 30, 2023			
Norwalk, Connecticut 06850	5. Docket No. 030-38609			
~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~	Reference No.			
8	2			
<ol> <li>Byproduct, source, and/or special nuclear material</li> <li>Chemical and/or physical form 8. Maximum amount that licensee may possess at any one time under this license</li> </ol>				
A. Strontium 90 A. Sealed Source A. 55 millicuries (Amersham Model SIA.20)				
9. Authorized use:				
A. Opthalmic applicator for superficial application, plesiotherapy, for tumors or benign conditions in animals.				
CONDITIONS				
10. Licensed material may be used or stored only at the licensee's facilities located at Veterinary Cancer Center, 129 Glover Avenue, Norwalk, Connecticut.				
11. Licensed material shall be used by, or under the supervision of John Farrelly, DVM, MS.				
12. The Radiation Safety Officer for this license is John Farrelly, DVM, MS.				
13. The licensee shall not use licensed material in or on human beings.				
14. The licensee shall conduct a physical inventory every six months, or at other intervals approved by the U.S. Nuclear Regulatory Commission, to account for all sources and/or devices received and possessed under the license. Records of inventories shall be maintained for 5 years from the date of each inventory and shall include the radionuclides, quantities, manufacturer's name and model numbers, and the date of the inventory.

			Amendment No. 1
15.	A. Sealed sources shall be tested for leakage and/or contamination at intervals not to exintervals specified in the certificate of registration issued by the U.S. Nuclear Regula Commission under 10 CFR 32.210 or under equivalent regulations of an Agreemer		/or contamination at intervals not to exceed the on issued by the U.S. Nuclear Regulatory equivalent regulations of an Agreement State.
B. In the absence of a certificate from a transferor indicating that a leak test has been the intervals specified in the certificate of registration issued by the U.S. Nuclear F Commission under 10 CFR 32.210 or under equivalent regulations of an Agreeme to the transfer, a sealed source received from another person shall not be put into tested and the test results received.		indicating that a leak test has been made within ration issued by the U.S. Nuclear Regulatory uivalent regulations of an Agreement State, prior mother person shall not be put into use until	
	C.	Sealed sources need not be tested if they are in when they are removed from storage for use or been tested within the required leak test interva sealed source shall be stored for a period of mo leakage and/or contamination.	n storage and are not being used; however, transferred to another person and have not I, they shall be tested before use or transfer. No ore than 10 years without being tested for
	D.	The leak test shall be capable of detecting the radioactive material on the test sample. If the t (185 becquerels) or more of removable contam Nuclear Regulatory Commission in accordance be removed immediately from service and deco accordance with Commission regulations.	presence of 0.005 microcurie (185 becquerels) of est reveals the presence of 0.005 microcurie ination, a report shall be filed with the U.S. with 10 CFR 30.50(c)(2), and the source shall ontaminated, repaired, or disposed of in
	E.	Tests for leakage and/or contamination, limited to leak test sample collection, shall be performed by the licensee or by other persons specifically licensed by the U.S. Nuclear Regulatory Commission or an Agreement State to perform such services. The licensee is not authorized to perform the analysis; analysis of leak test samples must be performed by perso specifically licensed by U.S. Nuclear Regulatory Commission or an Agreement State to perfor such services.	
	F.	Records of leak test results shall be kept in unit years.	s of microcuries and shall be maintained for 5
16.	The lic 10 CFI	ensee is authorized to transport licensed materia R Part 71, "Packaging and Transportation of Radi	in accordance with the provisions of oactive Material."
