ATTN: Director, Division of Nuclear Materials Safety

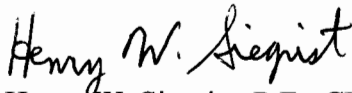

RE: Amended Activities at Temporary Job Site Utilizing U.S. NRC Radioactive
Material License #06-30556-01 Amendment 04, Temporary Location: Pfizer,
Radiosynthesis Building 118, Groton, Connecticut

Cabrera Services Inc. (CABRERA) is providing this written notification of an amendment to the CABRERA Material License #06-30556-01 notification currently in use at a temporary job site. The attached information is provided as required by license condition 18A.

We trust that this information is sufficient to permit continued use of CABRERA material license #06-30556-01 Amendment 04 at the temporary job site. This license or reciprocity is currently in use at 5 other sites in three states (CA, HI, NY). No activity exceeding license limitations will be conducted. CABRERA will notify the Regional Administrator, U.S. Nuclear Regulatory Commission, within 30 days of termination of activities at this job site in keeping with license condition 18B.

If you should have any questions regarding this notification, please contact Henry W. Siegrist at CABRERA (860) 569-0095 (voice) or (860) 569-0277 (fax).

Sincerely,

Henry W. Siegrist, P.E., CHP
RSO, Corporate Health Physicist

**ATTACHMENT
PFIZER RADIOSYNTHESIS LABORATORY
DECOMMISSIONING, BLDG 118**

**(Amendment 1 June 24, 2013
to Control No. 580412)**

Cabrera Services, Inc. (CABRERA) is providing radiological decontamination and decommissioning services followed by Final Status Survey (FSS) of selected areas of the Pfizer Radiosynthesis Laboratory, Building 118. The site has been identified as having radioactive contamination associated with an NRC radioactive materials license and subsequent use of radionuclides associated with the Pfizer license.

This amendment 1 revises the completion date from June 30, 2013 to July 31, 2013 to address a revision to the scope of work. The expanded work scope includes additional examination and removal of potentially affected equipment and building construction materials. Areas found to have radioactive materials present above work plan limits will have the materials removed and staged into approved disposal containers. Ship out of the staged radioactive materials has not yet been determined but is expected to be completed on or about July 31, 2013.

No other changes are made by this amendment from the scope of work and notification as provided to the NRC by Cabrera notification, April 8, 2013, Control No. 580412.

This information is being transmitted to you as required by condition 18A of the Cabrera Materials License.
