Re: Amendment to the Quantity of  
Nuclear Gauges

Dear License Assistant Team:

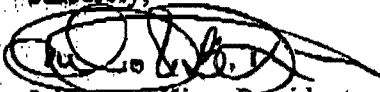

Per my conversation with someone (Mike) on your team earlier today please be advised that I, Julio U.B. King of J.U.B. King Quality Control Services request an amendment to our new application dated June 20, 2013 as follows:

- In lieu of one (1) Nuclear Gauge as requested for my company, I hereby request that it be replaced by the use of two (2) Nuclear Gauges  
Note: The quantity not to exceed the maximum activity of 32mCi and 160mCi.

In addition, due to the urgency of the lack of independent testing companies in the islands, I ask that this application be expedited if anyway possible. The only company just closed its door two (2) months ago and being a construction company also, it is imperative that testing be done on a continual basis.

Should there be any questions, please feel free to contact me via email ([jking@jubking.com](mailto:jking@jubking.com)) or telephone (340-690-6407) at your earliest convenience.

Sincerely,

  
Julio U.B. King, President
