Dear Exec. Secretary:

The restart of the nuclear plants in Japan for cheap nuclear energy presents the future in cheap natural gas. Yes nuclear energy is an economical option. Other countries will follow.

The world must develop safe/cheap nuclear energy. Cheap/Dangerous is a bad combination for all nations.

Best!

Louis Zrebiec, Ph.D.

**Subject:** RESTART REACTORS IN JAPAN

Dear Dr. Amano:

The restart of the nuclear plants in Japan(Fukushima Plant Operator Intends to Restart Reactors Elsewhere, The New York Times, July 3, 2013) requires close supervision from the IAEA.

EVERYWHERE YOU LOOK THERE IS A GEOLOGICAL FAULT IN JAPAN.

Yes, nuclear facilities in Japan must be designed to withstand these problems. They must be self-contained and self-activated for such quakes.

The IAEA must ensure the safety of the world over cheap nuclear power.

All nations must respect the dangers of radioactive poisoning. Global safety must be fundamental.

Best wishes!

Louis Zrebiec, Ph.D.
