030-05064

4. LICENSE NUMBER(S)

24-00188-02

5. DATE(S) OF INSPECTION

6/25/13

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- ☒ 1. Based on the inspection findings, no violations were identified.
- ☒ 2. Previous violation(s) closed.
- ☐ 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

Non-cited violation(s) were discussed involving the following requirement(s):

- ☐ 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.  
(Violations and Corrective Actions)

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

- ☒ Main Office Inspection  
☐ Field Office Inspection  
☐ Temporary Job Site Inspection

Next Inspection Date: 06/2014

**PROGRAM SCOPE**

The licensee is a radiography company located in St. Louis, Missouri. The licensee is authorized to conduct radiography operations at temporary job sites and within an approved permanent radiography installation (PRI) at the licensee's facility in St. Louis, Missouri. The licensee currently employs 17 radiographers and one assistant radiographer. The licensee currently possesses several Iridium 192 (Ir-192) and a Cobalt 60 (CO-60) radiography exposure devices.

**Performance Observation**

At the time of the inspection, the NRC inspector did not have the opportunity to observe the performance of an industrial radiography operation at a temporary job site. However, the inspector observed the licensee perform radiography operations within the approved PRI. The inspector observed a qualified radiographer perform three radiography exposures with the appropriate survey instrument, dosimetry, and licensee procedures. The inspector observed the qualified radiographer perform all the necessary surveys, equipment checks, and alarm check. The inspector also toured the facilities of the main office and performed radiation surveys of the storage area/PRI. The inspection also included a review of selected records such as dosimetry, radiographer field audits, quarterly inventories and maintenance, leak tests, survey instrument and dosimetry calibrations, annual audits and radiation safety training, Department of Transportation training, survey records and daily utilization logs. The inspector also interviewed several qualified radiographers regarding the licensee's Emergency Operating procedures. The inspector closed out the previous violation from the last inspection.

No violations of NRC requirements were identified.
