Docket No. 40-8857
SUA-1511

Power Resources, Inc.
ATTN: Paul Hildenbrand
P.O. Box 1210
Glenrock, Wyoming 82637

Dear Mr. Hildenbrand,

Your letter dated November 4, 1992, requested withdrawal of your request for an amendment to Source Material License SUA-1511, submitted to the NRC by your letter dated May 6, 1992. Within that submittal, you had requested an amendment to allow Power Resources, Inc., (PRI) to construct and operate a joint in situ byproduct material disposal facility. You also had restated PRI's intent to pursue an exemption (reduction) in the long-term surveillance fee for a byproduct disposal site which is required by Criterion 10 of 10 CFR 40, initially requested by your letter dated April 27, 1992.

As requested, we are terminating our review of your license amendment request dated May 6, 1992, and all licensing actions regarding authorization to construct and operate the proposed disposal facility. This will also terminate our review of a waiver or an exemption to long-term surveillance fees for the proposed disposal site.

If you have any questions, please call Cynthia Miller-Corbett of my staff at (303)231-5811.

Sincerely,

A handwritten signature in dark ink, appearing to read "Ramon E. Hall", written over a light background.

Ramon E. Hall
Director
