## NRC FORM 374

## U.S. NUCLEAR REGULATORY COMMISSION

PAGE 1 OF 2 PAGES
Amendment No. 4

## **MATERIALS LICENSE**

Pursuant to the Atomic Energy Act of 1954, as amended, the Energy Reorganization Act of 1974 (Public Law 93-438), and Title 10, Code of Federal Regulations, Chapter I, Parts 30, 31, 32, 33, 34, 35, 36, 39, 40, and 70, and in reliance on statements and representations heretofore made by the licensee, a license is hereby issued authorizing the licensee to receive, acquire, possess, and transfer byproduct, source, and special nuclear material designated below; to use such material for the purpose(s) and at the place(s) designated below; to deliver or transfer such material to persons authorized to receive it in accordance with the regulations of the applicable Part(s). This license shall be deemed to contain the conditions specified in Section 183 of the Atomic Energy Act of 1954, as amended, and is subject to all applicable rules, regulations, and orders of the Nuclear Regulatory Commission now or hereafter in effect and to any conditions specified below.

A. through E. Research and development as defined in 10 CFR 30.4.

## CONDITIONS

- 10. Licensed material may be used or stored only at the licensee's facilities located at 300 George Street, Suite 301, New Haven, Connecticut.
- 11. A. Licensed material shall be used by, or under the supervision of, Joseph A. Ippolito, Ph.D. or Kimberly Kelly.
  - B. The Radiation Safety Officer for this license is Joseph A. Ippolito, Ph.D.
- 12. The licensee shall not use licensed material in or on human beings.
- 13. The licensee shall not use licensed material in field applications where it is released except as provided otherwise by specific condition of this license.
- 14. The licensee is authorized to hold byproduct material with a physical half-life of less than or equal to

120	days for decay-in-storage before disposal with	out regard to its radioa	activity if th	ne lic	ense	e:		
A.	Monitors byproduct material at the surface before disposal and determines that its radioactivity cannot be distinguished from the background radiation level with an appropriate radiation detection survey meter set on its most sensitive scale and with no interposed shielding; and							

containers and that will be managed as biomedical waste after they have been released from the licensee; and

C. Maintains records of the disposal of licensed materials for 3 years. The record must include the

Removes or obliterates all radiation labels, except for radiation labels on materials that are within

date of disposal, the survey instrument used, the background radiation level, the radiation level measured at the surface of each waste container, and the name of the individual who performed the disposal.

- 15. The licensee is authorized to transport licensed material in accordance with the provisions of 10 CFR Part 71, "Packaging and Transportation of Radioactive Material."
- 16. Except as specifically provided otherwise in this license, the licensee shall conduct its program in accordance with the statements, representations, and procedures contained in the documents, including any enclosures, listed below. The U.S. Nuclear Regulatory Commission's regulations shall govern unless the statements, representations, and procedures in the licensee's application and correspondence are more restrictive than the regulations.
  - A. Application dated Application dated April 3, 2012 (ML12097A540)
