Thanks. That was my conclusion, but I wanted to verify so there was no doubt.

She received it. I sent another copy to the correct address after this one got kicked back. I called her to follow up and make sure that she got all the attachments, too, so I would know for sure that she got everything.

Briana,

Did Julie receive this email? Her address is "@NOAA.gov", not "@nmfs.gov".

Thanks,
Joe

Julie,

I attached the NRC's completed responses to the questions on Pilgrim that you sent in your April 9 email to follow-up on our partial response dated April 10.

I will also be forwarding several zip files containing the documents referenced in the responses in subsequent emails. I tried to send them all as one zip folder, but it seems as if my agency's email attachment size limit is a bit higher than yours—the last email I was able to send, but it came back undeliverable. All of the references should also be publically available in our ADAMS system also, and I have included the accession number for each in the attached responses, so that would be another way for you to access those documents if email doesn't work.
