

AMERICAN MULTI-CINEMA, INC.
920 MAIN STREET
KANSAS CITY, MO 64105
T: 816 221 4000

April 10, 2013

Director of FSME
Attn: GLTS
USNRC
Washington, DC 20555-0001

In fulfillment of the requirements of 10 CFR 31.5 (c) 8, we hereby notify you that on April 10, 2013 we transferred the self-luminous exit signs listed on the attached spreadsheet to Isolite, C/O Co-Physics, 1 Commercial Drive, Florida, NY 10921 with CNSC License #NSPFOL-12.02/2009. As required, for each sign listed on the spreadsheet, we include the name of the manufacturer, model number, and serial number.

If you should have any questions, please contact me at the address below.

Regards,

A handwritten signature in black ink, appearing to read "Brian Cooksey", is written over a horizontal line.

DOT Hazmat Training and Acknowledgement FOR RETURN OF SELF-LUMINOUS EXIT SIGNS

- > Self-Luminous EXIT signs are illuminated with internal light sources powered by tritium gas. Tritium gas is a radioactive isotope of hydrogen. For this reason, Federal Regulations require that any person shipping this product must have training sufficient to comply with US Department of Transportation regulations in the Code of Federal Regulations #49 Part 172.
- > To receive this training, the shipper must read, understand and perform the following steps. Place a check mark at each step after complete. Sign and date this form. Upon receipt of this completed form we will provide you with the RMA Number required for the return of these signs along with complete shipping instructions.
- > Keep this completed form in your files for at least 3 years in case of regulatory inspection.

- The EXIT signs are to be shipped as excepted packages for radioactive instruments and articles (49CFR 173.424). No special packaging is necessary.
- A sturdy cardboard box, will be sufficient to ship the signs because they all meet the general package design requirements of 49CFR173.410. The package must withstand normal conditions of transport without any deterioration. The carton should be new, so the shipper can be certain that there is no radioactive contamination on the container.
- You must ensure that the active materials (the glowing inner tubes) are completely enclosed by non-active components (the sign housing). Therefore, each sign must be visually inspected to ensure that it is not crushed or punctured in a way that might cause an inner light tube to be broken.
- Each sign must contain less than 22 curies of tritium (see the sign's rear label). The total amount of curies to be placed into each container must be less than 100 Ci. (Add up the curie content of each sign as you put them into the container.)
- If a transportation incident occurs, you must report the incident to the USDOT per 49 CFR 171.15 and 171.16.
- Read and understand "Isolite Packaging Instructions for the Return of Self-Luminous Exit Signs." and follow each step exactly.
