Subject: RE: Sealed Source & Device Registry Number

Importance: High

Kevin:

I apologize for the delay in trying to issue this amendment to you to add a thorium-228 source. I will talk to the license reviewer who added Item 6J, 7J, and 8J to your license & see what documentation they used to ensure the sealed source was registered. In the meantime, please note that the isotope in question is Th-228; however, it looks like Eckert and Ziegler is referencing a Co-60 source below. Please clarify with the manufacturer if a sealed source & device registry number exists for the Th-228 sealed source model 3636.

Thanking you in advanced for your assistance in this matter,

Jackie

Jackie,

Evidently, we cannot get this number for you. I do not quite understand the issue, but here is the word from Eckert & Ziegler:

Hi Larry, the Co-60 listed below does not have a registry number. Please let me know if you have any questions. Thank you

CKRB19732
Co-60, 6.3kBq +/- 30%, VZ-3636-003
Active length: 2m
Activity not calibrated

Subject: Expedited Amendment Request dated May 2, 2013

Good Afternoon Kevin:

I'm having problems accessing the Sealed Source & Device Registry (SSDR) so I asked another license reviewer to look up the proposed new source you are wanting to get but she is having problems finding it. Can you please find out from the manufacturer the SSDR number for the Eckert & Ziegler Model 3636?

Thanking you in advanced for your assistance in this matter,

Jackie
