SUBJECT
Our review of your termination request letter dated March 28, 2013

SUMMARY
We have reviewed your termination request and find that submitted materials are insufficient for us to continue this action until we have received additional information regarding the following:

Your initial request was missing your facility's radioactive use history, together with any final closeout and disposition surveys.

As discussed by phone, please submit an NRC Form 314, found at <http://www.nrc.gov/reading-rm/doc-collections/forms/nrc314.pdf>. Note the radioactive materials receipt, use, storage, and/or disposal history for your facility, and include any final closeout surveys and or leak/tests for areas where radioactive materials were received, used, or stored. If final closeout surveys are not available and/or practical, attach a copy of your most recent sealed source leak tests, as applicable, as well as any receipt and transfer surveys for materials received at your facility. The NRC Form 314 must be signed by a management official for Northern Biomedical Research. Include the name and address of the individual to which the final termination should be directed.

Response dated May 7, 2013, was received by U.S. Mail on May 13, 2013 including Form but only noting tritium surveys.

Continue on Page 2

ACTION REQUIRED (IF ANY)
We have requested that the licensee submit an NRC Form 314, preferably attached to a signed, dated cover letter and referencing Control No. 580320, as listed at the top of this memo. The response should include final status and surveys as stated above.

As discussed, we expect that you will submit requested information within 14 days of our conversation. Please FAX your response to my attention at (630) 515-1078, or scan your response and send to me via email, as a pdf file.

We expected to and did receive your written response on or before May 21, 2013.

Please direct any questions you have to me at (630) 829-9892 or sara.forster@nrc.gov.
