KING OF PRUSSIA, PENNSYLVANIA 19406-2713

July 18, 2013

Docket No. 03016037
Control No. 580518

License No. 47-19081-01

Paul Martin
President
Martin Engineering, PLLC
P.O. Box 589
101 Carriage Way, Suite 104
Hurricane, WV 25526

SUBJECT: MARTIN ENGINEERING, PLLC, LICENSE AMENDMENT, CONTROL NO.
580518

Dear Mr. Martin:

This refers to your license amendment request received by NRC on April 29, 2013, describing the transfer of NRC licensed activities from Barbourville Testing Lab., Inc. to Martin Engineering, PLLC. From your letter, we understand that this transfer did not result in any changes to the location of use, materials, persons using licensed material, or persons responsible for radiation safety at the licensed facility.

Based on the above understandings, we consent to the transfer of your licensed activities that occurred in April 2013. Future changes in the licensed name, use, location, and persons responsible for licensed material require submission of a request to amend the license, and NRC approval must be received prior to these changes.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region I Office, Licensing Assistance Team, (610) 337-5239, so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14).

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits**, see our **toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

Thank you for your cooperation.

Sincerely,

Original signed by Michael Reichard
