

SAFETY INSPECTION REPORT AND COMPLIANCE INSPECTION

1. LICENSEE/LOCATION INSPECTED:

Science Applications International Corporation
13397 Lakefront Drive
Suite 100
Earth City, MO

REPORT NUMBER(S) 2013-001

2. NRC/REGIONAL OFFICE

Region III
U. S. Nuclear Regulatory Commission
2443 Warrenville Road, Suite 210
Lisle, IL 60532-4352

3. DOCKET NUMBER(S)

030-37229

4. LICENSE NUMBER(S)

24-32591-01

5. DATE(S) OF INSPECTION

July 15, 2013

LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- 1. Based on the inspection findings, no violations were identified.
- 2. Previous violation(s) closed.
- 3. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, and corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy, to exercise discretion, were satisfied.

_____ Non-cited violation(s) were discussed involving the following requirement(s):

- 4. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements and are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.
(Violations and Corrective Actions)

Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

Main Office Inspection Next Inspection Date: July 2016

Field Office Inspection

Temporary Job Site Inspection

PROGRAM SCOPE

This licensee is a technical services company authorized by its NRC license to possess source material incident to the conduct of radiological site characterizations activities. The licensee has performed these activities solely for the Department of the Army at the Jefferson Proving Ground in Indiana as part of an effort to develop the site's decommissioning plan. The licensee expects that the Army will submit a final version of that plan to the NRC in August 2013. The licensee is also authorized to perform instrument calibration and leak test sample analysis as commercial services, which it performs at its facility in Earth City, Missouri. The licensee possesses a number of radioactive sources in exempt quantities to facilitate these services, but possess no specifically-licensed material at this time.

PERFORMANCE OBSERVATIONS

The inspector toured the licensee's calibration facility and conducted independent surveys to verify compliance with public dose limits. The inspector interviewed the RSO, one of the two health physicists who performed work at JPG, and the calibration technician; all demonstrated adequate knowledge of radiological principles and practices. The inspector reviewed records for calibration facility surveys and annual program audits conducted by the company's quality assurance manager.

No violations of NRC requirements were identified as a result of this inspection.
