Subject: STP - 2-week Look-Ahead Actions

John,

We are closing in to complete Chapter 3. To make sure we don't have any last minute surprises, I am jotting down these notes for us to track. If I miss anything, please help to fill in and I'll catch up next time. Nothing is too trivial. I have the following to-go actions for Chapter 3:

1. FSAR CR to correct the hydrostatic load factor to 1.7 in 3H.6.4.3.4.3 as provided in response to RAI 03.03.02-4.
2. FSAR CR to address 3.9.6 comments from Tom Scarborough in his Rev 9 review and 3.9.6 confirmatory items. Currently, 3.9.6 is still showing a CI.
3. The redacted version of the November 2012 audit report.
4. WCAP 17385 to support the locations of strain gauge stress measurements vs predictions in end-to-end comparison.
5. Plan and schedule to resolve Drs Ziada's and Ma's comments on WCAP 17385.
6. NINA's proprietary review comments on Chapters 3.7 and 3.8 SER.

Regards

Tom Tai
