Subject: NRC FOIA request

FOIA REQUEST
Case No.: 2013-0308
Date Recd: 7/29/13
Specialist: Burkhalter
Requester Email:

Hi,

I would like access to any and all records relating to any a) permit applications, b) permits issued, or c) correspondence relating to the use of Depleted Uranium by the Oil and Gas industry.

These applications could be for, (but not limited to) the use of DU in perforation guns or as radiation sources in well-logging.

Upon information and belief, the following companies may have applied for such permits:

Schlumberger, Halliburton, Perf Tech Wireline Services, Welex Jet Services, Inc, Otis Engineering,

Gearhart Industries, GO Company, GO Wireline, GO Oil Well Services, Gearhart-Owen Industries,

Widco Mandrel Industries, Pengo Manufacturing, Peterson Engineering, Well Reconnaissance, Perfco, Wireline Electronics, Computalog Wireline, Rockbit Industries, Damballa, J-W Wireline, C+J Wireline, Rocky Mountain Wireline, Baker-Hughes,

This list is meant to assist NRC in processing this request, however, this request is not limited to these companies.

I am seeking NRC form 244, and any other supplemental materials, permits, correspondence, etc.

I would prefer the results in electronic form, PDF or DVD, to save on costs.

Please do not hesitate to contact me if you need additional information.

Best Regards,
William Huston

(b)(6)
