Subject: Revised Completion Date for Reportable Event Longer Term Corrective Action

References: 1) NRC License SNM-1097, Docket 70-1113
2) GNF-A Event Report 48554, 12/4/12
3) GNF-A 30 Day Report of Event, 1/3/13

Dear Sir or Madam:

On January 3, 2013 Global Nuclear Fuel – Americas L.L.C. (GNF-A) submitted a 30 day written report (Reference 3) in response to Event Notification 48554. The immediate and short-term corrective actions and two of the three longer term corrective actions have been completed for this event.

The remaining longer term corrective action is to develop a procedure to provide internal guidance for the independence of design criteria of controls used for Items Relied on for Safety (IROFS) with a scheduled completion date of July 31, 2013. Issuance of this guidance is taking longer than anticipated. As a result, GNF-A is submitting a revised scheduled completion date as shown for this item.

Longer-term Corrective Action

Develop procedure to provide internal guidance for the independence of design criteria of controls used for IROFS.

Scheduled completion: September 30, 2013

If you have any questions regarding this matter, please contact me at (910) 819-5950.

Sincerely,

Scott Murray, Manager
Facility Licensing
