Dear Sir or Madam:

03032959

This letter is in reference to NRC License 09-10672-03 as a request to amend the license by changing the status of the current RSO. Therefore, the actions to amend this license are as follows:

1. Please remove Stephanie Friedman, Ph.D., as the RSO, but leave her on the license.
2. Please add David Beddick, MS, as the RSO and add David to the license.

David Beddick completed RSO training at Harvard School of Public Health, Radiation Safety Officer Training for Laboratory Professionals during June 3-7, 2013. In addition, David has experience using S³⁵ in field and laboratory settings for the past seven years. His experience includes labeling marine sediment cores with S³⁵ to quantify sulfate reduction rates. Following incubation, cores were sectioned and distilled under acidic conditions prior to being counted using Liquid Scintillation methods.

For further questions, please contact Dr. Stephanie Friedman at 850-934-2468. Thank you for your attention to this matter.

Sincerely,

Richard M. Greene, Ph.D.
