SUBJECT: ADDITIONAL EXTENSION OF ACCREDITATION OF CURTISS-WRIGHT
CLASSIFIED SERVICES NETWORK SYSTEM SECURITY PLAN CW-ADP-1,
REVISION 2 - TECHNICAL ASSIGNMENT CONTROL NUMBER L34243

Dear Mr. Miner:

I am responding to your letter dated July 25, 2013 (ACM 13-0006), requesting the U.S. Nuclear Regulatory Commission (NRC) grant Curtiss-Wright Electro-Mechanical Corporation (CW) an additional 60-day extension of the accreditation of Classified Services Network System Security Plan CW-ADP-1, Revision 2, dated March 2010.

The NRC staff, in coordination with staff from the U.S. Department of Energy, Nuclear Energy Oak Ridge Site Office (DOE-ORO), has completed its review of your request. The NRC staff has determined that your request for a 60-day extension of the existing accreditation of the network described by CW's Classified Services Network System Security Plan CW-ADP-01, Revision 2, dated March 2010, is acceptable. As such, the accreditation of the network addressed in CW-ADP-01 is extended until October 6, 2013.

DOE-ORO is continuing their review of your most recently revised submittal and it is expected that DOE approval will be obtained for the replacement cyber security plan "ACP-CW Classified Service Network systems Security Plan (SSP)," CW-SSP-01, and the network will be authorized to operate under this plan prior to expiration of this extension.

The efforts under Technical Assignment Control Number (TAC) L34243 continue, therefore the TAC will remain open.

In accordance with Title 10 of the *Code of Federal Regulations* 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the publicly available records component of NRC's Agencywide Documents Access and Management System (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html> (The Public Electronic Reading Room).
